

CLEAN MARINE POLICY

Our Mission. Our Commitment.

The Town of Penetanguishene understands and recognizes the vital importance of maintaining a clean, natural environment as being fundamental to success and community wellbeing.

The Historic Port of Penetanguishene commits itself to the best of its ability to:

- Eliminate the release of contaminants to the water column, both directly and indirectly.
- Minimize the release of pollutants to the atmosphere.
- Avoid contamination of the ground.
- Adopt waste reduction, reuse and recycling strategies.
- Optimize energy and water conservation.
- Promote good environmental practices to all parties.
- Abide by and, where possible, exceed the requirements of all relevant legislation.

Management will introduce sound environmental practices into every aspect of Town operations of the Town Dock and wharf. The Town will train employees to understand and implement these practices. Resources will be provided that are needed to allow the policy to be fulfilled.

The philosophy of this policy will be integrated into the contract between the Town Dock and Town Dock Users.

All subcontractors will be made aware of the intent of this policy and will be encouraged to adopt the same good practices where appropriate.

This operation also commits itself to an ongoing program of self-evaluation. The Town will continually strive to upgrade and improve its environmental performance in consideration of future developments in facilities and environmental management techniques and best practices, as well as product availability.
